BIENVINIDO JAMES M. PUBLICO

Full-Stack Developer | Desktop Developer | IT Tech Support
San Pedro, Laguna, Philippines | 0992 233 6236 | publicojamesmangao25@gmail.com
GitHub: github.com/JamesMangao | Portfolio: bjp-portfolio.vercel.app

PROFESSIONAL SUMMARY

BS Information Technology graduate with hands-on experience in full-stack web development (Laravel, PHP, PostgreSQL), Windows desktop development (Tauri 2, Rust, React), mobile and offline-first web app development (Flutter, Supabase), and IT technical support (500-hour OJT at Milestone Computers Laguna). Built real, deployed projects — from AI-powered web platforms and artisan e-commerce systems to an offline-first point-of-sale running in production at an artisan pop-up booth. Certified by Cisco Networking Academy in IT Customer Support Basics and Computer Hardware Basics (July 2026). Open to IT Tech Support, Junior Developer, and Desktop Support roles.

SKILLS

- **Web Development:** Laravel 12, PHP, MySQL, PostgreSQL, React 18, TypeScript, JavaScript, HTML5/CSS3, Tailwind CSS, Alpine.js, Firebase, Supabase, REST APIs
- **Desktop Development:** Tauri 2, Rust, Windows API (windows-rs), Zustand, Recharts, Framer Motion
- **Mobile & Offline Apps:** Flutter, Android Studio, Flutter Web PWA, Drift (SQLite on WASM), Service Workers, Supabase sync, PDF receipts (pdf/printing)
- **AI Tools:** ChatGPT, Claude, Gemini, Perplexity, Ollama (local AI), AI provider REST API integration
- **IT Support:** Hardware Diagnostics, OS Installation, PC Assembly, Network Troubleshooting, End-User Support
- **Tools:** Git, GitHub, VS Code, Render, Cloudflare Pages, Docker, IIS Express | **Languages:** JavaScript, TypeScript, PHP, Python, Java, C++, Rust, VB.NET

PROFESSIONAL EXPERIENCE

IT Technician Intern (500 Hours) — Milestone Computers Laguna, San Pedro, Laguna

- Diagnosed and resolved 10+ hardware and software issues per week across desktop and laptop systems, minimizing client downtime and repeat visits.
- Assembled and performance-tested PC builds against quality checklists before client handoff, reducing returns due to hardware defects.
- Delivered end-user technical support with clear, structured troubleshooting, improving client satisfaction and repeat trust in the shop.
- Installed and configured operating systems, drivers, and software, ensuring consistent performance and fewer post-setup support calls.
- Performed preventive maintenance on client systems, cutting recurring technical failures and extending hardware lifespan.

PROJECTS

STAR:DOM POS — Offline-First Booth Point-of-Sale (Flutter Web PWA) | stardom-pos.pages.dev

- Solo developer: shipped an installable PWA point-of-sale for a real artisan pop-up booth (iPad), recording sales with zero network via local SQLite (Drift on WASM) and syncing to Supabase whenever Wi-Fi returns.
- Built five adaptive screens (Sell, Orders, Products, Reports, Settings), 80 mm PDF receipts through the iPad share sheet, cash count and Close Day reporting, and barcode scanning.
- Hardened delivery with a service-worker offline shell, same-origin assets (no CDN at runtime), owner sign-in, and a release build that fails if any secret leaks; deployed on Cloudflare Pages.

PCFixAI — Offline-First AI-Powered Windows Desktop App (v1.5.1) | github.com/JamesMangao/PCFixAI

- Solo developer: shipped a Windows desktop app (Tauri 2 / Rust backend, React 18 + TypeScript) with parallel diagnostic scans (~60% faster), 40+ system tools across 10 manager tabs, and optional AI chat via Ollama with offline

fallback.

- Built virus scanner with Windows Defender integration, event log analyzer (BSOD + system errors), power plan manager, exportable HTML system reports, and health history trend tracking.
- Implemented safe auto-fix agent (backs up startup entries before removal), real browser cache paths (Chrome, Edge, Brave, Firefox, Vivaldi, Opera), working hibernation toggle, and PowerShell injection prevention.
- Added light/dark themes, keyboard shortcuts (Ctrl+1-5, Ctrl+K), privilege detection with UAC warnings, and job history with exit codes. Deployed at v1.5.1 with 20+ stability patches.

STAR-DOM — Artisan E-Commerce Platform (33 Pages) | github.com/JamesMangao/STAR-DOM

- Full-stack developer: built a 33-page ASP.NET Web Forms e-commerce platform with PostgreSQL, GCash/GOtyme e-wallet payments with two-step verification, and J&T Express shipping integration.
- Implemented commission pipeline for custom artisan work, merchant studio dashboard, BIR-style receipts with VAT breakdown, and CSRF protection.

LifeVault — AI-Powered Journaling Platform | lifevault-t8jq.onrender.com

- Lead Developer (team of 3): built and deployed a full-stack Laravel 12 app (Blade, Firebase) as the team's finals deliverable.
- Integrated three AI providers via REST APIs to power an AI chatbot and Resume Analyzer (Tesseract OCR/Poppler), delivering automated, personalized feedback.

Parish Website — Catholic Parish Management System | sto-rosario-parish.onrender.com

- Built a Laravel 12 / Supabase portal covering mass intentions, events, gallery, bulletins, and inquiries, with batch status updates and automated email notifications.
- Engineered role-based access control (Super Admin, Staff, SocCom) and deployed on Render's free tier with uptime monitoring.

EcoCycle — Smart Recycling Reward System (Capstone) | Flutter, Laravel, MySQL, IoT

- Full-stack and mobile developer: built a Flutter app (reward tracking, QR scanning, redemption) and a Laravel/MySQL admin dashboard, integrated with an IoT recycling bin for real-time data exchange.

EDUCATION

Bachelor of Science in Information Technology — Lyceum of San Pedro | Graduated May 2026 | Deportment Award Recipient

CERTIFICATIONS

- **freeCodeCamp** (July 2026): Responsive Web Design, JavaScript Algorithms and Data Structures, Front-End Development Libraries, Scientific Computing with Python
- **Cisco Networking Academy** (July 2026): IT Customer Support Basics, Computer Hardware Basics
